SUMMARY

- Master of Applied Computing student with experience in data analysis, reporting, process improvement, web development, and dashboard creation using Excel, Power BI, SQL, and modern web technologies.

WORK EXPERIENCE

International Recruitment Assistant (Co-op) | University of Windsor

May 2026 – Present

- Created and maintained recruitment conversion reports using Excel, PivotTables, and data validation techniques to support enrollment decision-making.
- Improved the UI/UX of the University's Global Engagement and Educational Agents platforms using MoveON, enhancing search, filtering, and navigation.
- Collaborated with stakeholders to gather requirements, document processes, and support workflow automation initiatives using Monday.com and Microsoft 365.

Full Stack Web Developer | CNM Infotech Private Limited, Ludhiana, India

Sep 2024 - Dec 2024

- Developed Shopify Loyalty Management web application using PHP, Laravel, MySQL, HTML, CSS, and JavaScript; ensured quality through validation, troubleshooting, and release support in project-based environments.
- Collaborated with stakeholders/end users to analyze issues, translate requests into actionable tasks, and create structured documentation and reporting to improve service delivery outcomes.

Web Development Intern | CNM Infotech Private Limited, Ludhiana, India

Jan 2024 - Jun 2024

- Assisted in SDLC activities including testing support, defect tracking, documentation, and validation with attention to detail and deadlines.
- Supported Agile team workflows by coordinating tasks, communicating progress clearly, and maintaining structured updates aligned with delivery timelines.

PROJECTS

Secure Financial Transaction Management System

Tech Stack: Node.js, Google Cloud SQL (MySQL), JWT Authentication, Postman, GitHub

- Implemented core banking features including authentication, account management, fund transfers, transaction history, and audit logging for a system handling 1M+ records, ensuring secure access control and reliable transaction processing.
- Analyzed system logs and database outputs to confirm accuracy and document recurring issues; produced clear technical documentation to support faster resolution.

Superstore Sales Analysis

Tech Stack: Microsoft Excel, Pivot Tables, Pivot Charts, Slicers, Data Cleaning, Data Visualization

- Performed data extraction, cleaning, and validation; analyzed KPIs and trends to support performance measurement and reporting.
- Built interactive dashboards and reports using Excel Pivot tools to communicate insights clearly and support business decision-making.
